

SYED ASKARI ABBAS

Email: syedaskaria@gmail.com | Phone: +92-3478126440 | Location: Karachi, Pakistan

PROFESSIONAL SUMMARY

Motivated Full-Stack Software Engineer specializing in Next.js, React Native, NestJS, and Supabase. Proven track record of architecting scalable web and mobile applications, building real-time dispatch systems, writing high-performance REST/GraphQL APIs, and deploying production-grade logistics solutions.

TECHNICAL SKILLS

Languages & Core:	TypeScript, Modern JavaScript (ES6+), Clean Architecture, SOLID Principles
Backend & APIs:	Express.js, NestJS, Node.js, GraphQL, RESTful APIs, Real-Time WebSockets
Frontend & Mobile:	Next.js, React.js, React Native, Redux, Tailwind CSS, HTML5/CSS3
Databases & Cloud:	Supabase, PostgreSQL, MongoDB, Prisma ORM, TypeORM
Testing & Tools:	Jest, Postman, Git, GitHub, Docker, CI/CD, Vercel, Hostinger VPS

WORK EXPERIENCE

Full Stack Developer — Pixact Technologies 01/2026 – Present
Karachi, Pakistan

- Architected Multi-Tenant SaaS Services: Designed scalable backend architectures using NestJS, Express.js, and Supabase for enterprise logistics and mobile application services.
- Database & API Optimization: Engineered high-performance PostgreSQL queries and Supabase real-time subscriptions, reducing response latencies by 35% under high concurrency.
- Clean Architecture Implementation: Applied modular clean architecture to construct maintainable, reusable, and robust frontend and mobile component workflows.
- Containerized DevOps Workflows: Streamlined deployment pipelines using Docker on Hostinger VPS and Vercel, achieving 99.9% application availability.

MERN-Stack Developer — EYAI VENTURES 03/2025 – 11/2025
Karachi, Pakistan

- Scalable API Engineering: Built end-to-end RESTful and GraphQL APIs with strict type safety using TypeScript, Express.js, and Supabase database interactions.
- Unit & Integration Testing: Authored comprehensive unit test suites using Jest, raising system code coverage to 85%+ and minimizing production regressions.
- Database & State Management: Modeled relational schemas in PostgreSQL/Supabase, utilizing indexing and trigger logic to manage complex state transitions.

Frontend Developer (Internship) — OctaNet Services 10/2024 – 01/2025
Karachi, Pakistan

- Developed responsive user interface components using React.js and modern JavaScript, ensuring cross-browser compatibility and API integration.

FEATURED PROJECTS

Fuelwave — On-Demand Fuel Delivery & Fleet Management System Express.js, Next.js, React Native, Supabase

- Built an end-to-end fuel delivery ecosystem featuring a Next.js admin dashboard and a React Native mobile app for on-field drivers and customers.
- Implemented real-time GPS tracking and dynamic dispatch workflows via Supabase Realtime and Google Maps SDK for fuel tanker routing.
- Integrated automated order processing, fuel inventory tracking, and payment gateways built on Express.js REST APIs and Supabase database functions.

Averx Global — Enterprise Logistics & Cross-Border Courier Platform NestJS, Next.js, Supabase

- Architected a scalable enterprise logistics platform serving international shipping, warehousing, and parcel tracking operations across the GCC region.
- Developed modular microservices with NestJS and Supabase PostgreSQL for automated consignment booking, barcode scanning, and status updates.
- Designed a responsive Next.js frontend with role-based dashboard access for shipment manifests, warehouse analytics, and customer tracking portals.

EDUCATION

Bachelor of Science in Computer Science — Bahria University Graduated: Feb 2026
Karachi, Pakistan
